Sequence
Hanging Screen

Sequence Hanging Screen

Rich. Warm. Contemporary.

Sequence Hanging Screen is a sound absorbent, modular system made from 100% wool felt. It's succession of gradually increasing and decreasing circles creates a delicate sense of movement in a design that expresses our studio's interest in the visual principles of order and disorder.

Available either sliding or static, Sequence screen blends functionality and aesthetics to bring an elegant simplicity to workplace interiors. Panels function as a wall hung artwork, window dressing or room divider to create flexible semi-open areas for working, collaborating, and relaxing.

Application

The changing nature of the workplace requires areas within office environments that are both flexible and attractive. Facade hanging screen offers multiple options for the division and enhancement of open plan spaces. Sequence is a practical and beautiful solution for all kinds of spaces within the modern office including :

open plan office | reception | board & meeting room lounge | restaurant | atrium | showroom | break out space

Specification

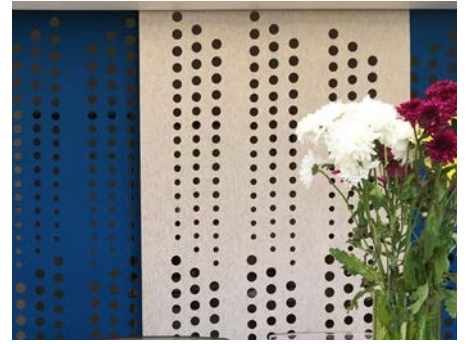

- Standard panel sizes 1200x2280mm / 1200x2500mm / 1200x3000mm
- Custom sizes available up to 1400mm width x 3000mm length
- Sliding or static screen options
- Static screen can be either ceiling or wall hung
- Panel weight: 3.9kg (1200x2280mm) / Felt density: 0.30g/cm³
- Kiss cut 5mm thick, German made 100% natural wool felt
- Naturally flame resistant fibres - passes BS 5867: Part 2: 2008 and Crib 5
- Hypo-allergenic natural material
- Available in 16 felt colours, dyed using environmentally friendly products
- Pantone colour match available to minimum order quantity

Lead times

Panels and track are made to order which takes 6 weeks.

Maintenance

Panels should be lightly brushed and spot cleaned with warm soapy water, but not soaked. Wool felt can be dry cleaned. A specialist should be consulted.

Product features

- Modular design suitable for small or large spaces
- Custom designs and sizes available
- Allows areas to be quickly and easily screened off and opened up
- Diffuses sound and light for increased privacy and comfort
- Smooth running and durable track system
- Self-extinguishing and inherently flame retardant wool fibres
- Custom colours and sizes available
- Designed and made in the UK

Hanging track

Tracks are made to order to required size and come fully assembled with fitting instructions. Screens attach securely to the track with velcro fixing.

Static track with vertical support rods for lowered panels.

Static track with velcro fixing for ceiling or wall.

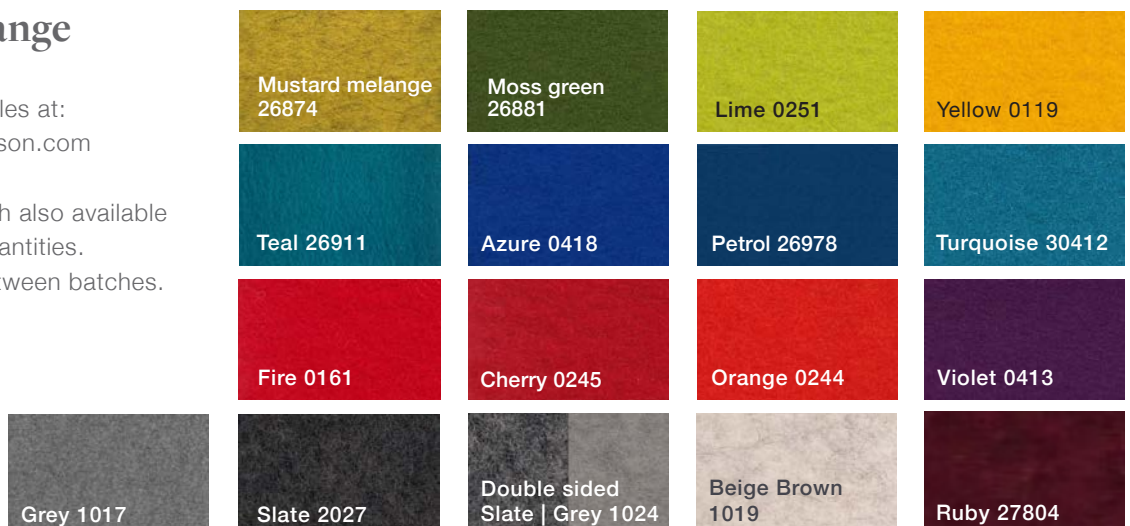

Multi channel sliding track. Maximum length 6 metres with between 2-5 channels.

Felt colour range

contact@friendsofwilson.com

Pantone colour match also available to minimum order quantities.
 Colours may vary between batches.

Architectural Acoustic Panels

Friends of Wilson's architectural acoustic panels enhance contemporary interiors whilst reducing noise.

Hard materials on walls, floors and ceilings lead to noisy environments because sound waves bounce back and reverberate. A noisy environment lowers concentration levels and productivity. High noise levels make interior spaces less comfortable, less welcoming, and less enjoyable.

Design flexible, semi-open areas for working, collaborating, and relaxing with our range of sound absorbent wall panels and hanging screens.

Abstract yet rich, our panels become an integral part of a building and make an interior space more welcoming, more enjoyable, and more stimulating.

Product range

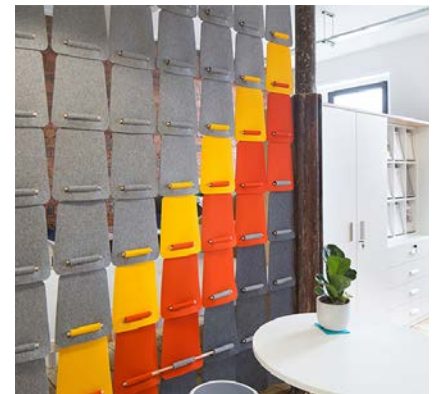

Flux Hanging Screen

Flux can be either a sliding or static screen to divide working and meeting areas within all kinds of spaces and workplace interiors.

Tessellate Wall Panel

Softly sculptured and tactile, Tessellate acoustic panel reduces reverberation while creating a rich feature within office interiors.

Cascade Hanging Screen

Cascade provides increased visual and acoustic privacy within open plan offices while maximising the functionality of a space.
