

Freestanding Screen

# Façade

Distinctive  
Tactile  
Versatile

Friends of Wilson

Façade blends art, design, and acoustics in a distinctive, contemporary room divider for well-functioning and inspiring workspaces.

Quickly and easily create flexible spaces with areas for collaborative and individual, focused working. At the same time, the semi-open design provides visual and noise privacy to reduce distraction while retaining the open plan feel of a space.

Facade is a modular floor standing screen system with multiple design options. The tessellated base plate enables you to layer and configure the screens in arrangements to suit your type and size space.

Made from sustainable 100% natural wool felt and with a simple tubular steel frame and base plate, Facade freestanding screen is minimal in design and construction and lightweight and flexible in use.

Select from a rich palette of wool felt colours to create a design language unique to your interior scheme.

# Façade

## Why designers choose Facade

Think of Facade screen as a series of functional artworks – placed either individually, as a pair, typtych or more- that create stylish environments and support your project needs.

At the same time the natural, sound absorbent material reduces noise and visual distraction and enhances ambiance.

The result? Flexible and inspirational workspaces that encourage collaboration and learning and
