

Acoustic light

Linear

Elegant & Tactile
Natural & sound
absorbent

Friends of Wilson

Linear is a beautiful and functional light made from naturally sound absorbent 100% pure wool felt with a minimal hanging system and soft, warm illumination.

Constructed from a single repeated modular element slotted onto a simple, circular aluminium frame, Linear's sculptured, elegant silhouette is enhanced by the materials richness of form and the shadows its light creates.

Hang Linear individually, as a pair, or triptych, or layered at different heights to create a design statement. Define areas and create inspiring, warm and stylish places where people thrive.

Choose from a palette of twelve nature inspired shades. Or request alternative colours and bespoke sizes to create a unique and distinctive design feature for your interior scheme.

Linear

Design for the circular economy

Linear's simple construction, interchangeable modular parts allows it to be disassembled, repurposed, reused, and ultimately recycled. Made from recycled and natural materials it demonstrates our studio's commitment to sustainability and design for the circular economy.

Natural materials

Linear shade is made from durable, long lasting and easy to keep clean, pure wool felt for product longevity.

Repurpose& recycle

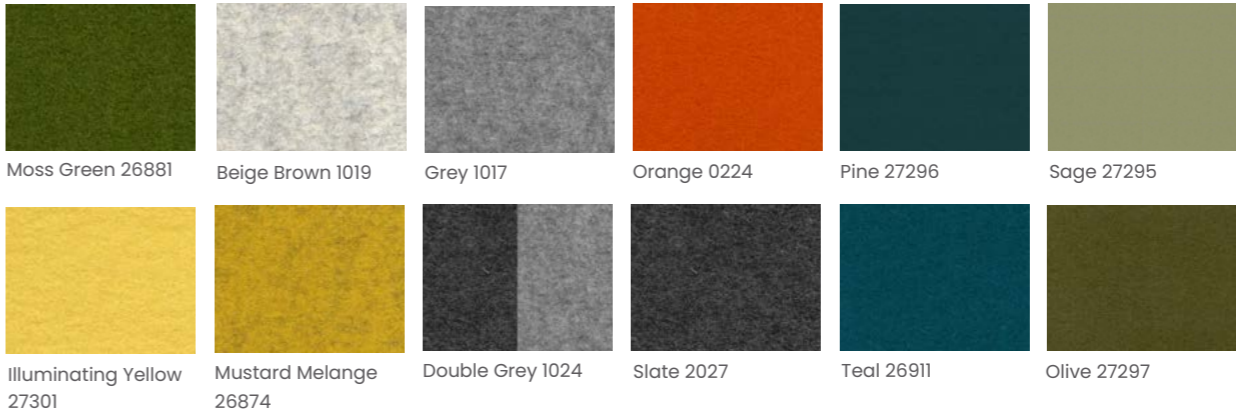

Wool felt modular felt sections slot onto an aluminium frame to allow for panels to be interchanged and disassembled.

Recycled components

Custom recycled bulb diffuser. Frame made from minimum 30% recycled aluminium

Colour palette

Sculptured. Elegant. Warm.

Linear combines art, design, and acoustics to give you an elegant, sustainable lighting solution for your open plan space, reception or meeting room. At the same time the natural, sound absorbent material reduces noise levels and enhances ambiance.

The result? Flexible and inspirational workspaces that encourage collaboration and learning and stimulate creativity.
