Carving out new and natural work zones.

Facet is a modular pod screening system made from all natural bamboo and 100% wool felt. Its elegant, pared back construction creates an effect that is honest, functional and understated.

Facet speaks to a new direction in design, reflecting our complex times and desire for transparency, simplicity and longevity.

The entire system is held together with carefully designed wool felt tabs, eliminating the need for glue, stitching or separate fixings. Clever, natural and sound absorbent, Facet is both a product of its time and a design with timeless appeal.
