

Hanging Screen

Playful
Animated
Durable

Sequence

Friends of Wilson

Sequence is a practical and beautiful hanging screen made from 100% wool felt.

Sequence is built on a flexible modular system with static or sliding panels. Screens can be layered on the multi-channel sliding track to easily and quickly close off and open up areas.

Each panel is made from durable natural wool fibres that are easy to keep clean and long-lasting. Plus they can be easily swapped out thanks to the easy-to-use velcro fixing.

Choose from eighteen vibrant and muted shades and three standard panel sizes. Or request alternative colours and panel sizes as a special order.

Sequence

Application

Sequence hanging screen is a versatile, easy to install screening solution for all kinds of interior spaces including:

- Open plan office
- Reception
- Restaurant
- Board and meeting rooms
- Glass fronted meeting rooms
- Break out spaces
- Home office

Specification

Features

- 100% renewable, biodegradable and non-toxic natural wool material
- Modular design suitable for small or large spaces
- Allows areas to be quickly and easily screened off and opened up
- Diffuses sound and light for increased privacy and comfort
- Smooth running and durable track system
- Self-extinguishing and inherently flame retardant wool fibres
- Designed and made in the UK

Hanging track

Sliding

Alter the experience with two to five channels for layered screen installations

Ceiling

fixed directly to ceilings for static screen installations

Suspended

Fixed to vertical posts for static screen installations; avoiding lights and air-conditioning

Colour palette

Available in a range of natural colours, Sequence combines art, design and acoustics to give you a visually rich screening solution or absorbent artwork for your open plan space, reception or meeting room. At the same time the natural, sound absorbent material reduces noise distraction and enhances ambiance.

The result? Flexible and inspirational workspaces with that encourage collaboration and learning and stimulate creativity.
